

# Automatic Report generator pdf - LAX-SYD route

Hi, this is an example report generated by my python script. In this example, I have taken route specific data from Cirium, specifically LAX-SYD Route. This script can also reproduce report even if database have changed/updated with new data. Since this is still under development, this is not the final look of this pdf. If there are any suggestions on graphs/layouts/new data, please tell me and I'll fix it. - Lucy, Coco, Avinash  
This is the monthly average % poo origin from LAX-SYD, which indicates the percentage of passengers with citizenship of the country of origin

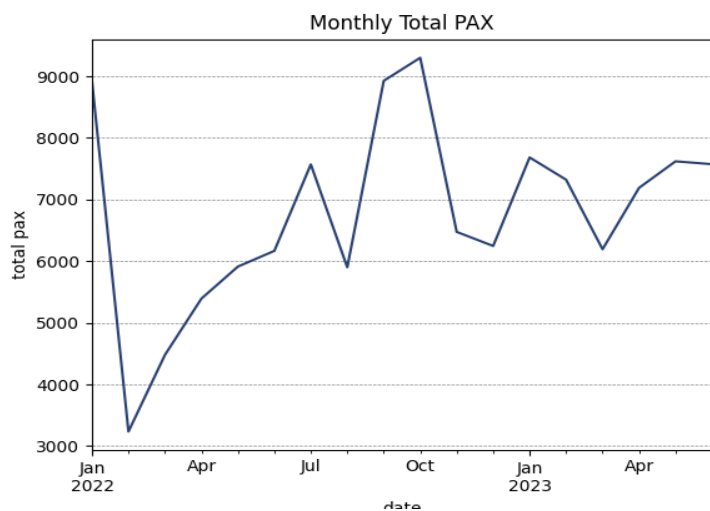

Monthly Average %poo origin

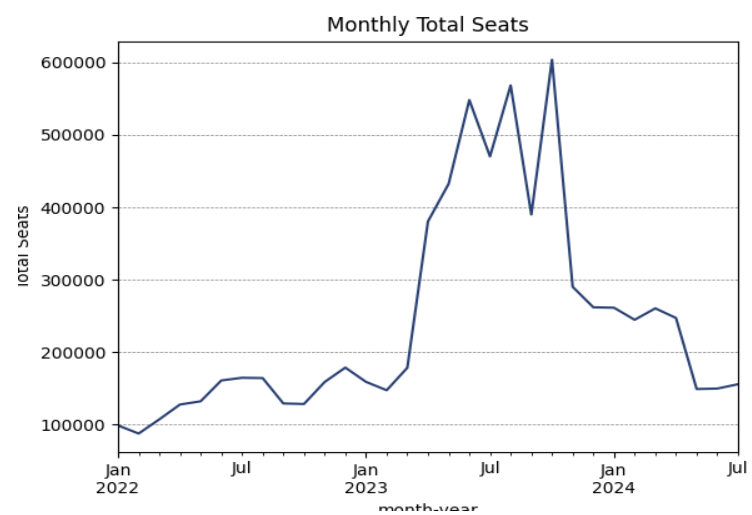

This is the average monthly revenue from LAX-SYD

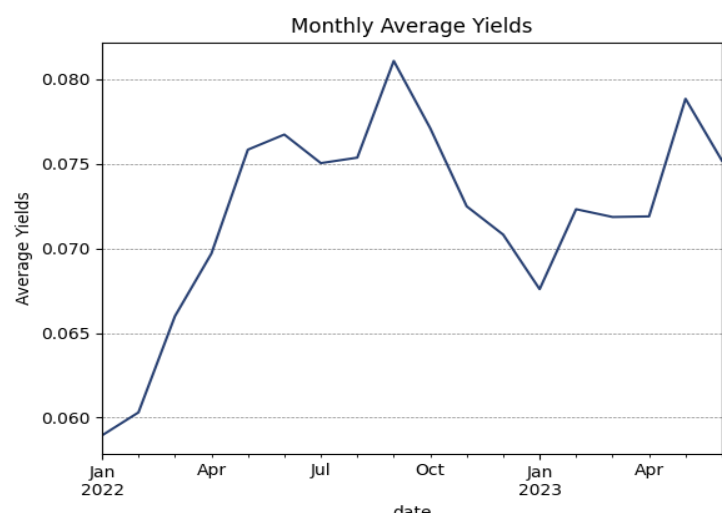

This is the total monthly passenger from LAX-SYD

This is the total monthly seats from LAX-SYD

This is the average yield from LAX-SYD

This is just a demo pdf based on data from LAX-SYD only.
